Professional Summary

Computer Science undergraduate with hands-on experience in C++, Linux systems, multithreaded programming, networking, and automation. Proven track record of building scalable software and infrastructure solutions during internship at Nokia. Strong foundation in Data Structures, Algorithms, Operating Systems, and Distributed Systems with a passion for systems and backend engineering.

Education

The National Institute of Engineering, Mysore Expected August 2026
Bachelor of Technology in Computer Science Engineering
CGPA: 8.3/10

Satyam International School, Patna July 2021
Intermediate (PCM)

St. Dominic Savio's High School, Patna May 2019
Secondary Education

Technical Skills

- **Languages:** C++, Java, Python, JavaScript
- **Core CS:** Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks, Distributed Systems
- **System Programming:** Multithreading, Socket Programming, Linux System Programming
- **Frameworks & Databases:** Node.js, React.js, MongoDB, MySQL
- **Tools:** Git, GitHub, Docker, Linux, Jira
- **Automation:** Ansible, Infrastructure Automation, HPE iLO

Experience

Software Engineering Intern | Nokia Solutions Networks India 08/2025 - 06/2026
Technologies: Python, Linux, Ansible, Jira, HPE iLO

- Developed and enhanced features for CALM, an internal lab automation platform that streamlined infrastructure operations and was subsequently accepted and adopted by Nokia's global teams.
- Developed Linux-based switch automation modules that automatically managed inactive network ports, reducing lab electricity consumption by 37% and improving infrastructure efficiency.
- Automated HPE iLO patching workflows for Linux-based server infrastructure, reducing firmware update time by 60% and enabling faster maintenance cycles.

Student Coordinator Intern | AfterPassout Pvt Ltd 09/2024 – 11/2024
Technologies: React.js, JavaScript, HTML, CSS

- Managed engagement and operational coordination for 200+ students, ensuring effective communication between students and cross-functional teams.
- Organized 10+ webinars and contributed to frontend improvements, enhancing platform usability and increasing student participation.

Projects

ThreadLink – Multi-Threaded TCP Chat System | Github C++, Linux, Socket Programming

- Built a multi-threaded TCP chat application supporting 10+ concurrent clients, private/public messaging, dynamic user management, and asynchronous communication using POSIX sockets and select().
- Designed a thread-per-client server architecture using std::thread and std::mutex to enable real-time communication among multiple concurrent users.

Scalable URL Shortener Service Node.js, Express.js, MongoDB

- Built a URL shortening service with custom alias generation and efficient redirection handling, supporting 10,000+ URL mappings.
- Designed RESTful APIs for link creation, analytics tracking, and URL management with sub-second redirection latency. Improved retrieval performance through database indexing, reducing query execution time by approximately 40%.

Self-Healing Recovery Automation System Ansible, Python, Jira

- Developed an automated recovery system capable of restoring deleted or cyberattack-affected files, reducing manual recovery effort by approximately 80%.
- Automated Jira ticket updates and IT escalation workflows, cutting incident response time from hours to minutes.

Certifications

- Building Modern Distributed Systems with Java – [Packt](#)
- Cybersecurity Architecture – [IBM](#)
- Linux Fundamentals – [LearnQuest](#)
- Managing Linux Systems – [LearnQuest](#)
- Fundamentals of Ansible – [Red Hat](#)

Competitive Programming

- LeetCode Contest Rating: 1630
